In discharging this overall responsibility, Axminster Town Council is also responsible for ensuring that there is a sound system of internal control which facilitates the effective exercise of the Council's functions and which includes arrangements for the management of risk.

Purpose of the Systems of Internal Control:

The system of internal control is designed to manage risk at a reasonable level rather than to eliminate all risks of failure to achieve policies, aims and objectives; it can therefore only provide reasonable and not absolute assurance of effectiveness. The system of internal control is based on an on-going process designed to identify and prioritise the risks to the achievement of the Council's policies, aims and objectives, to evaluate the likelihood of those risks being realised and the impact should they be realised and to manage them effectively and economically.

3. Competence	<p>No evidence that internal work has not been carried out ethically, with integrity and objectivity.</p> <p>Internal auditor familiar with governance processes and accounting regulations for town & parish councils</p> <p>Qualification: See over.</p>	<p>Will TenBroeke (of STA Accounting) is qualified as an ACA; Associate Chartered Accountant.</p>

5. Audit Planning and reporting	The audit is a feature of a wider plan with regards to internal control. Characteristics of Effectiveness		
---	--	--

Expected Standard	Evidence of Achievement	Is this standard achieved/needs
Internal audit work is planned	Planned internal audit work is based on risk assessment and designed to meet the body's governance assurance needs.	
Understanding the whole organisation its needs and objectives	The annual review demonstrates how audit work will provide assurance in relation to the body's annual governance statement.	
Be seen as a catalyst for change	Supportive role of audit for corporate developments such as corporate governance review, risk management and ethics.	
Add value and assist the organisation in achieving its objectives	Demonstrated through positive management responses to recommendations and follow up action where called for.	
Be forward looking	When identifying risks and in formulating the annual internal control plan, changes on national agenda are considered. Internal audit maintains awareness of new developments in the services, risk management and corporate governance.	

Be challenging	Internal audit focuses on risks and encourages members to develop their own responses to risks, rather than relying solely on audit recommendations. The aim of this is to encourage greater ownership of control environment.	
Ensure the right resources are available	Adequate resource is made available for internal audit to complete its work. Internal auditor understands the body and the legal and corporate framework in which it operates.	No such work had been undertaken due to staffing resources and lack of debate amongst members. Rigorous systems have now been implemented in line with internal auditors recommendations and observations. These systems will be reviewed in light of any finding from this year's internal and external audit.
